Greensmaster® eTriFlex®

Electric Riding Greensmowers

AN ALL-ELECTRIC RIDER, CHARGED WITH GREENS PERFECTION.

The Greensmaster eTriFlex models carry no hydraulic fluid and utilize all-electric components for traction, steering, lift and reel drive. These Energy Smart® models are operationally-friendly with noticeable noise reductions, operational cost savings, and other meaningful improvements to complement the ever-important enhancements in cutting performance.

Combining the innovative, Double A-Arm Suspension System with industry-leading Flex technology, the cutting units float freely over even the most difficult terrain. The Radius Dependent Speed (RDS™) system, in combination with the Lift-In-Turn cutting unit leveling feature virtually eliminates the effect known as "Triplex-Ring". This substantially improves both the aesthetics and playability of the green.

Superior cutting performance is only the beginning. The patented Lift-Gate Footrest, Tool-Free QuickChange™ cutting units, Automatic "Slow-in-Turn" and Auto-Brake on operator dismount are just a few of the many features that provide added versatility, simplified service, and ultimately, more productivity.
